

COILED TUBING

Services & Solutions

THE EASY CHOICE FOR COMPLEX LATERALS

Nine Energy Service is equipped with the expertise and tools to handle the industry's most challenging and complex coiled tubing projects.

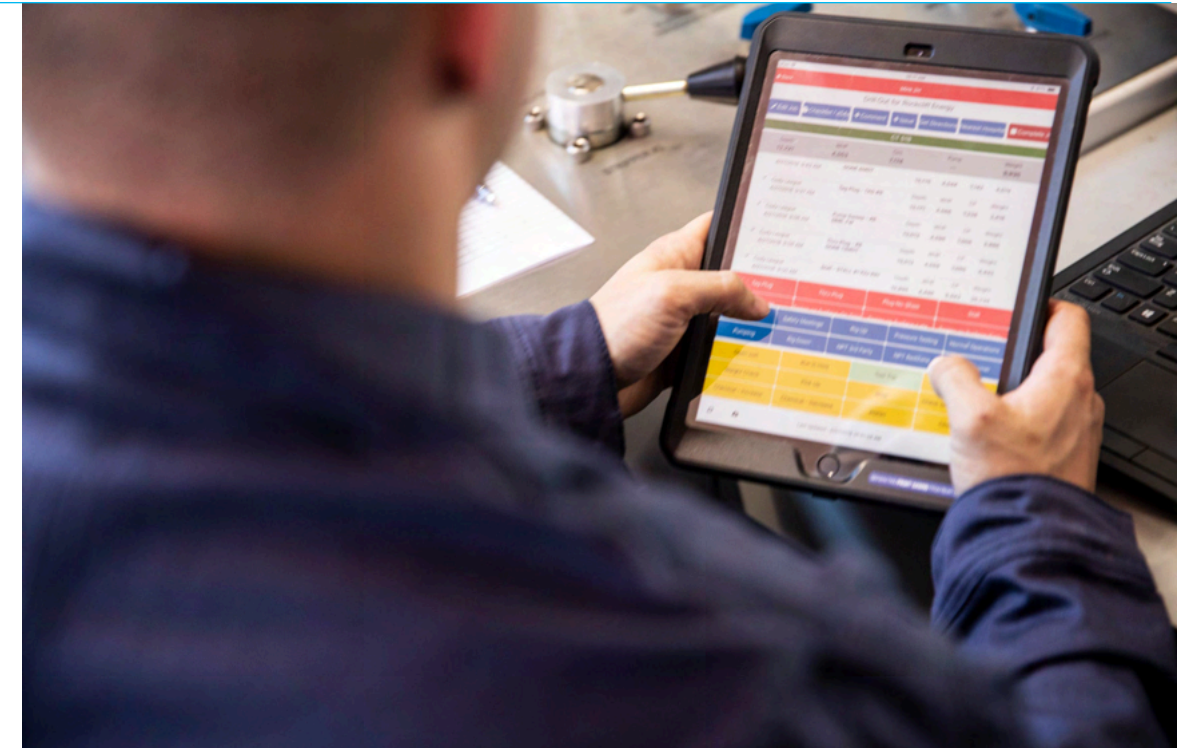

Backed by our talented team of technicians and engineers, our solutions can help you improve performance, safety, and cost-efficiency on extreme laterals and high-pressure operations.

COILED TUBING SERVICES

Our coiled tubing units range from 1 to 2 5/8-inches in diameter. With large capacity units, we can run up to 28,000 feet of 2 5/8-inch coiled tubing.

Our Support Services Include:

- Frac plug millout
- Wellbore cleanout
- Fluid pumping
- Nitrogen pumping and bulk nitrogen delivery/sales
- Tubing-conveyed perforating (jet or abrasive)
- Fishing/milling
- Stimulation via coiled tubing
- Crane Services
- Pre-job engineering, planning, and design with industry-leading software

AllSight Live Jobsite Dashboard: Monitor and Manage Project Details

Electronically track, evaluate, and manage every aspect of your coiled tubing job with real-time and historical data. Field tested and fully operational with all of our units, our proprietary internet-based software puts unmatched power of better decision making in your hands.

FEATURES INCLUDE:

- + Complete transparency of coiled tubing operations, allowing you to make more informed decisions now and for future operations
- + Accurate, real-time job information including surface and downhole events, data acquisition monitoring, and comprehensive non-productive time statistics
- + Vital job information available from any internet-connected device
- + Data point scrolling and zooming capabilities to clarify operational issues and performance in detail
- + A checklist to improve quality and safety issues, including digital Job Safety Evaluations, personnel certifications and renewal alerts along with inspection and maintenance histories
- + Comparative equipment data and performance metrics
- + Chemical information and relevant Safety Data sheets
- + Visual display of metrics such as rig-up times, non-productive time, time in well, plug millout times, running footage, and other relevant data

Expertise, Equipment and Expectations: **Delivered Fast**

With Nine Energy Service, you're not waiting around for your well to become productive and profitable. We promptly deliver the equipment and expertise to service the longest and most complex horizontal wells—at any stage.

We're also quick on our feet. We know how to solve problems, even when those problems are outside of our job scope. Ultimately, our speed is a result of doing things the right way, ensuring safety and compliance every step of the way.

ULTRA DEEP REACH | PREMIER UNIT

INTRODUCING THE PHOENIX

Nine's newest and most capable coiled tubing unit purpose-built for ultra deep reach. Outfitted with 2.625" tubing, upgradeable to 2.875".

Engineered for the Deepest, Most Demanding Wells

The Phoenix is designed for operators who refuse to compromise on depth, performance, or reliability. Whether pushing past 30,000 feet of lateral or tackling the most complex wellbore interventions in the basin, this unit is built for the job.

But specs only tell part of the story. What sets The Phoenix apart is who runs it—Nine's most seasoned coiled tubing crews, putting years of deep well experience behind every job.

Unit Specifications:

- 35,000 ft maximum reel capacity
- 200,000 lbs injector pull force
- 2.875" full diameter capability
- Premier crew classification
- AllSight Live job site monitoring
- Ultra-deep lateral reach operations

ELITE CREWS. EVERY JOB.

The Phoenix is crewed exclusively with Nine's highest-level coiled tubing operators hand-selected for their depth of knowledge on complex, ultra-deep well profiles.

NINE IS WHERE YOU NEED US.

We support customers in major North American Basins with comprehensive solutions and expertise.
